FEED EQUIPMENT BATCHING SKIDS

ST-Series Skid, with double hammermill

ST-Series Skid, with single hammermill

S-Series Skid

COMPACT DESIGN

The compact skid design allows these complete batching systems to fit in tight spaces. It also makes them a great choice in retrofit applications. Not only that but the skids are designed to easily fit into shipping containers making them a convenient choice to ship around the world.

Sudenga's skid-mounted feed batching systems provide a compact, all-in-one-solution that can be customized for your operation. Systems include options for mixers (1,000-6,000 lbs), hammermills (single, double, or none), surge hoppers, and motor control panels.

Choose between two skid models:

ST-SERIES

- Horizontal mixer (1000, 2000, or 4000 lb)
- Surge hopper
- Hammermill (single or double)
- Motor control panel (optional)

S-SERIES

- Horizontal mixer (1000, 2000, 4000, or 6000 lb)
- Hammermill (optional)
- Motor control panel (optional)

BENEFITS OF A BATCHING SKID

Compact: Feed batching skids are typically compact in size and can be installed in tight spaces, making them a space-saving solution for small feed mills or on-farm feed mixing operations.

Efficient: Batching skids can be used to make and mix small batches of feed quickly and efficiently, reducing the need for manual labor and saving time.

Quality: The use of automated systems helps to ensure you get a consistent, high-quality feed product.

Cost-effective: Batching skids are often less expensive than larger, more complex batching systems, making them a cost-effective option for small-scale feed operations. They can even be retrofitted into your existing installation.

Make more feed—faster, with a batching skid from Sudenga.

Are you looking for a more efficient and reliable way to manage your feed production? If so, look no further than Sudenga's state-of-the-art feed batching system. Our feed batching systems are designed with the needs of modern farmers in mind. Our skids can help you reduce waste, save time, and increase productivity, all while providing the highest quality feed for your livestock. Sudenga's skids are customizable, and can be retrofitted into existing installations. Whether you are raising poultry, hogs, cattle, or any other type of livestock, our feed batching system can help you optimize your feed production process and improve your bottom line.
